

We are a company designed and, more importantly committed to providing the healthcare market with solutions to any medical device decontamination problem. We recognise and fully understand the decontamination compliance challenges facing healthcare facilities within the Acute, Primary Care and Private sectors.

Do you have any decontamination challenges within a Sterile Services Unit, an Endoscopy Department, Operating Theatres, Out Patient Departments, ENT Service, Podiatry or Dental Service? If so, we can provide you with the answers and the systems to eliminate them. Working with senior managers, infection prevention and control specialists and individual department / service managers we can offer, implement and manage the solutions you need.

All of the following products and services are available for use within all areas where decontamination of re-useable medical devices is carried out e.g. Sterile Services Units, Endoscopy Departments, Hospital Wards, ITU's, OPD's Operating Theatres, Podiatry and Dental Services etc.
