Re: Decon Solutions Consultancy Services

BHRUT employed Martin Williams from Decon Solutions to undertake a Trust wide audit of decontamination services including Sterile Services Department in April 2009 and again in September 2011 and 2017 to review all decontamination services.

All contact with the company and its employees was discreet, efficient and BHRT were given expert advice as required. A full report highlighting areas for improvement was produced on both occasions enabling the Trust to take forward any action plans around improvements.

We would re employ Decon Solutions for future audit and expert advice.
